

Tired of walking into the same four walls of an office or hospital every day? Join us today as a Phlebotomist and help people invest in prevention instead of treatments, while you bring our services to the communities that need us the most!

Life Line Screening is the nation's leading provider of community-based preventive health screenings. Along with a medical team of trained professionals, you will contribute to helping over 700,000 adults each year gain useful insight into their health by administering medical appropriate health screenings and tests. These services are designed to help provide people become aware of their health risk factors for chronic vascular diseases, stroke, and other diseases *early* so they can take proactive steps towards maintaining or improving their health through lifestyle changes or under continued care with their doctor.

We are excited to now be hiring Certified Phlebotomists for a unique opportunity within our Clinical Trial Division. Our Phlebotomists will join our Life Line Screening team as they provide preventative health screening services at various locations within a 150 mile radius of your major metro area. Schedules run Monday – Friday and up to every other Saturday. Shifts will vary based on commute times, which range from 20 minutes up to 3 hour one-way. Schedules are made 90 days in advance. No on-call, No 2nd or 3rd shifts, No Sundays, No major holidays.

If you're passionate about helping others and are excited about seeing new faces and different places every day, we'd love to talk to you!

What you'll do:

- Review patient records for accuracy and completeness
- Label and ensure all samples are accurately identified
- Set up and prepare all equipment and supplies for venipuncture procedure
- Venipuncture and finger-sticks
- Centrifuge blood sample as outlined in clinical protocol provided
- Monitor patients for reactions as well as ensure the quality of the sample
- Ensure patient confidentiality and comfortability while meeting customer service expectations throughout entire process
- Oversee and ensure proper sanitation and cleaning of equipment and work areas between patients
- Utilize personal protective equipment correctly to ensure the safety of coworkers and patients
- Correctly label transfer tubes and following exact directions for handling and storing specimens for transport

- Properly package and ship specimens to central lab on a daily basis
- Cross train and occasionally work on Medical Assistant Stations including: ABI, EKG, and bone density testing.

What you'll need:

- Precision phlebotomy skills with a minimum of 3 years' experience with adult venipuncture
- Experienced with centrifuge and separating serum and plasma specimens into transport tubes using transfer devices
- A desire to provide unparalleled customer service
- Great attention to detail and organization
- Willing to cross train to perform additional tasks, such as: "Ankle Brachial Index", "Osteoporosis", "AFIB", and other health screenings
- Valid Driver's License and the ability to be insured to drive a company vehicle (paid commute in a company vehicle)
- Must be able to meet required physical demands with or without reasonable accommodation.
