

## COVID-19 Guidance Starting May 11, 2023

- Individual circumstance will dictate length of time you should isolate from the campus.
- Scenarios and Response –
  - #1 - Exhibits 1 or more symptoms of COVID-19 – Isolate and test (PCR or Antigen) immediately.
    - If Negative – isolation ends and you may access campus
    - If Positive – follow scenario #2
  - #2 – Tested Positive for COVID-19 and exhibits 1 or more symptoms of COVID-19
    - Isolate for at least 5 full days and possibly longer. If symptoms are moderate (you experience shortness of breath or had difficulty breathing) or severe (you were hospitalized or you have a weakened immune system), you need to isolate through Day 10.
    - If you had mild symptoms and your symptoms are improving, you may end isolation after Day 5 if you are fever-free for 24 hours (without the use of fever reducing medication). If symptoms are not improving, continue to isolate until you are fever-free for 24 hours.
    - Mask for 10 full days (regardless of whether isolation ends at Day 5 or Day 10).
  - #3 – Tested Positive for COVID-19 but exhibits no symptoms of COVID-19
    - Isolate for 5 full days
    - Mask for 10 full days
- Administrative Guideline 4-18 COVID-19 Response & Control Guideline has been updated to allow for flexibility. The CDC guidance now includes recommendations for prevention strategies based on associated COVID-19 community levels. The COVID-19 levels take into account the following three factors: hospitalization rates, healthcare burden, and COVID-19 cases.
- **Masks** are no longer required on campus unless you are experiencing symptoms or following a positive COVID test. This requirement is subject to change at the discretion of the College.
