

**BLACK HAWK COLLEGE
BOARD REPORT**

Board Report #9045
November 28, 2016

**APPOINTMENT OF ADVISORY COMMITTEE MEMBERS FOR CAREER PROGRAMS
2016-2017 ACADEMIC YEAR**

REPORT: According to Board Policy Manual 4.70 College Processes, "The College shall utilize both internal and external advisory committees as needed to provide communication channels between the College and its various constituencies. The College will strive through these communication channels to foster the collegial process among its several internal components and to afford through its external advisory committees a continuing awareness of changing educational needs of the community and its residents, and thus be enabled to respond to these needs with appropriate educational programs."

The Career Programs have active advisory committees that provide input on curricula development and include members of the Black Hawk College faculty and administration. The external memberships on the committees actively inform Black Hawk College faculty and administration on the ever changing needs of business and employers in the community.

Faculty and administration of the Career Programs periodically update program advisory membership through a systematic process that seeks broad-based representation of large and small employers, alumni and non-alumni. In certain cases, accrediting agencies set forth guidelines on the memberships of these groups. Memberships on the committees are for staggered, fixed terms of two or three years, which allows for the addition of new members annually. Those persons listed on the attachments have expressed interest in serving for 2016-2017.

RECOMMENDATION:

It is the recommendation of the College President that the Board of Trustees considers appointment of the Advisory Committee members on the attached list for the District's Career Programs for the 2016-2017 academic year.
