PLEASE NOTE: Alphabetize [2.7.1] and double-space the entire Works Cited list

Listed below are the most significant revisions to the MLA documentation style for print and web citations.

- **URL/DOI [p. 48]**: A URL should be included in the citation whenever applicable. Exclude the http:// portion. If a DOI (Digital Object Identifier) is given, use that in place of the URL. (Scholarly electronic journals will typically provide a DOI). **DOIs and URLs are optional elements, follow your instructor’s guidelines on whether or not to include these.**

- **No More Publication Medium**: Citations should no longer include the medium (such as Print or Web) except in cases of an unusual medium (such as radio or transcript), which is not explicit in the rest of your citation information.

- **No More Abbreviations of a Person’s Role [p. 37]**: Do not abbreviate roles like editor (Ed.), write out “editor” or “edited by” depending on the location of the information within the citation.

- **City of Publication [p. 51]**: You should no longer list the city of publication in your citation unless your source was published prior to 1900 or had different versions (with changes in spelling or vocabulary) published in different countries.

- **Omit Missing Information [p. 20]**: Include as much information as you are able to gather. If you do not have a piece of information, such as page numbers or publication date, simply omit that information. You no longer need to write n.p. (no publisher) or n.pag. (no pagination)

**General Print Format**: Author. “Title.” *Title*, editor name, vol., no., publisher, publication date, location.

**Books**

**Two Authors [pp. 21-25]**
